Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(application filed on or after May 29, 2000)

The patent term adjustment to date is 0 days. If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the term adjustment will be 0 days.

If a continued prosecution application (CPA) was filed in the above-identified application, the filing date that determines patent term adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) system. (<http://pair.uspto.gov>)

Any questions regarding the patent term extension or adjustment determination should be directed to the Office of Patent Legal Administration at (703)305-1383.

Notice of Possible Fee Increase on October 1, 2002

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2002, then the amount due may be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there may be an increase in fees effective on October 1, 2002. See Revision of Patent and Trademark Fees for Fiscal Year 2003: Notice of Proposed Rulemaking, 67 Fed. Reg. 30634, 30636 (May 7, 2002). Although a change to the amount of the publication fee is not currently proposed for October 2002, if the issue fee or publication fee is to be paid on or after October 1, 2002, applicant should check the USPTO web site for the current fees before submitting the payment. The USPTO Internet address for the fee schedule is: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of any fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after October 1, 2002 (or mailed with a certificate of mailing on or after October 1, 2002), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

EXAMINER'S AMENDMENT AND REASONS FOR ALLOWANCE

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with William H. Wright on October 25, 2002.

The application has been amended as follows:

- (1) In claim 105, line 4, "the" has been replaced with --a--.
- (2) In claim 109, line 2, --first-- has been inserted before each instance of "transducer".

2. The following is an examiner's statement of reasons for allowance:

Re claim 78; the prior art of record fails to teach or suggest a servo controller that receives a measure of errors of detected signals in relation to recovered data; and generates a position error signal indicative of corrections determined for the first and second tracking relationships in response to the measure as data recovery circuitry derives data from the detected signals.

Re claim 87; the prior art of record fails to teach or suggest a servo controller that receives a measure of errors of detected signals in relation to recovered data; and generates a position error signal for adjusting positions of the read and write heads in response to the measure as data recovery circuitry derives data from the detected signals.

Art Unit: 2651

Re claim 100; the prior art of record fails to teach or suggest a servo controller coupled to data recovery circuitry to receive a measure of errors of detected signals in relation to recovered data; and to generate a position error signal having a magnitude representing a magnitude of a correction to be made to adjust the first and second tracking relationships.

Re claim 101; the prior art of record fails to teach or suggest data processing circuitry generating a measure of errors in detected signals relative to derived data, the measure varying with misalignments in a relative positional relationship between the read head and the first data storage structure in a predetermined manner; and a servo control system for generating a position error signal in response to the measure of errors for adjusting positions of the read and write heads, the position error signal having a magnitude representing a magnitude of the adjustment of position of the read head.

Re claim 102; the prior art of record fails to teach or suggest performing a control function in response to a control signal containing information about errors in sensed data containing at least one constraint and identified using the at least one constraint to improve an accuracy of the first and second tracking relationships as a function of an extent of errors in the sensed data, the control function being performed as the first transducer generates the first signal.

Re claim 103; the prior art of record fails to teach or suggest producing a substantially continuously supplied dynamic servo signal to improve an accuracy of the first and second tracking relationships responsive to a control signal containing

Art Unit: 2651

information about errors in sensed data, the sensed data containing at least one constraint used to identify errors in the sensed data.

Re claim 104; the prior art of record fails to teach or suggest generating a position error signal representing the magnitude and direction in which the first and second transducers are to be moved to improve magnetoresistive element alignment relative to the track in response to a control signal containing information about errors in sensed data, the sensed data containing at least one constraint used to identify errors in the sensed data.

Re claim 105; the prior art of record fails to teach or suggest adjusting the positions of the read and write elements with respect to the first and storage media, respectively, in response to information about an extent of errors in the first signal and a direction of a position error correction, the data containing at least one constraint.

Re claim 106; the prior art of record fails to teach or suggest performing a control function to reduce a position error of a first transducer by an amount determined by the extent of errors in the sensed data and simultaneously to reduce a position error of the second transducer in response to a control signal containing information about the extent of errors in the sensed data, the sensed data containing at least one constraint, the control function being performed as the first signal is produced.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
